

**US Army Corps
of Engineers®**
Philadelphia District

PROJECT FACTSHEET

**Port Jervis
Orange County, NY**

January 2009

CONGRESSIONAL DISTRICTS: Rep. Hall (NY-19)

APPROPRIATION / PHASE:
Continuing Authorities / Feasibility

BUSINESS PROGRAM:
Flood Damage Reduction

AUTHORITY: Section 205 of the Water Resources Development Act of 1996 as amended.

LOCATION: The study area is the City of Port Jervis at the confluence of the Delaware and Neversink Rivers in western Orange County, New York.

DESCRIPTION: The City of Port Jervis has requested Corps of Engineers assistance in flood damage reduction efforts in the City which could include restoring two urban streams which have been culverted and channelized and also non-structural efforts to reduce flooding and storm water problems.

STATUS: The study area was investigated and an initial evaluation completed. An Initial Appraisal (IA) was developed which proposes floodplain restoration that could significantly improve the aquatic environment through stream and riparian restoration. FY08 funds would be used to execute a FCSA with the non-Federal sponsor and continue the feasibility study. An analysis of alternatives and an environmental assessment of the selected plan will be prepared during the feasibility phase.
